SUMMARY

Creative Technologist and AI Product Builder with extensive experience across film, advertising, and gaming. Combines a strong visual and technical background with product development, UX design, and AI automation. Experienced in leading teams, solving complex problems, and turning ideas into working products.

CORE EXPERTISE

Creative Technology · Product Thinking · UX & Workflow Design · AI Workflows & Automation · Creative Problem Solving · Visual Production · Team Leadership

EXPERIENCE

Stents.ai | Founder / AI Product Builder | *Mar 2026 to Present*

- Designed and built an AI powered creative production platform that takes projects from brief to final edit, including an integrated editing timeline.
- Developed creative workflows integrating automation, AI agents, language models, and generative media tools across different stages of production.
- Designed systems for maintaining context and visual consistency throughout complex production processes.

Moon Active | Senior Compositor / Colorist | *Tel Aviv | Sep 2023 to Jan 2026*

- Worked as a senior compositor and colorist on marketing content across multiple game titles.
- Explored ways to improve production workflows, including the use of AI tools.
- Collaborated with creative and production teams to solve visual and technical challenges.
